DETAILED ACTION

Drawings

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 9/13/02 have been accepted. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 2-4 and 16-18 recites the limitation "with said group IIB element" in claims 1 and 13. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 and 13-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Shakuda (US005825052A). Shakuda teaches the device of claims 1-5 and 13-19 in

Art Unit: 2813

that a gallium nitride (part 3, column 3 line 36) layer is doped with Mg, Zn (zinc), or Cd (cadmium) column 3 line 51 or column 4 line 29) to form a light emitting diode (column 4 line 10) as in claim 14. the dopant level is 1×10^{17} - 1×10^{19} (column 6 line 29), within the range of claims 4 and 18 (not less than 1×10^{17}) and therefore meets the criteria of heavily doped (claim 3). Gallium nitride is GaN as in claim 5. A voltage is applied to layer 4 on the doped GaN layer, thus, layer 4 is an active layer on the GaN layer.

Response to Arguments

6. Applicant's arguments with respect to claims 1-5 and 13-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2813

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
